### Contributions and Funding Policy

Act 205 of 1984, the Municipal Pension Plan Funding Standard and Recovery Act, initiated actuarial funding requirements for Pennsylvania municipal pension plans. Under Act 205 provisions, a municipal budget must provide for the full payment of the minimum municipal obligation (MMO) to each employee pension fund of the municipality. Act 189 of 1990 amended Act 205 and redefined the calculation used to determine the MMO to employee pension funds. The MMO is now defined as the total financial requirements to the pension fund, less funding adjustments and estimated member contributions.

As a condition of participation, full-time employees are currently not required to contribute to the Plan. This contribution is governed by the Plan's ordinances and collective bargaining agreement. In accordance with Act 205, as amended, the Borough was required to contribute to the Plan for the year 2021 as showed in the exhibit below:

**NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

**Basis of Accounting**

The Plan's financial statements are prepared using the accrual basis of accounting. Plan pension payments and member/employer contributions are recognized in the period in which they are due. Benefits and refunds are recognized when due and payable in accordance with the terms of the Plan.

**Method Used to Value Investments**

Investments are reported at fair value. Securities traded on a national or international exchange are valued at the last reported sales price at current exchange rates.

**Expenses**

Investment expenses consist of investment management, custodial fees, and other significant investment related costs. Administrative expenses consist of consulting, actuarial, legal, and accounting services, along with any other significant Plan related costs. The above expenses are allowable pension Plan expenditures in accordance with Act 205 and may be funded with Plan assets.

**Adoption of Accounting Standards**

GASB Statement 40, Deposit and Investment Risk Disclosures, was effective for periods beginning after June 15, 2004. GASB Statement 67, Financial Reporting for Pension Plans, was effective for fiscal years beginning after June 15, 2013. The Plan has adopted GASB 40 in previous financial statements and GASB 67 beginning with the 2014 financial statements.

**NOTE 3 – INVESTMENTS**

**Deposits and Investments**

The deposits and investments of the Plan are held separately from those of the Borough and are governed by Title 20 of the Pennsylvania Consolidated Statutes, Chapter 73 Municipalities Investments, Section 7302.

**Deposits**

The Plan held no deposits that were exposed to custodial credit risk or foreign currency risk as of December 31, 2021.

**Investments**

As of December 31, 2021, the Plan's investment balances were as follows:

<b><u>Investment Type</u></b>	<b><u>Fair Value</u></b>	<b><u>Maturity</u></b>
PSABMRT	\$6,189,325	Not Applicable

**Investment Policy Summary**

The Plan's investment policy has been delegated to the PSABMRT in regards to the allocation of invested Plan assets. The investment policy is established and may be amended by the PSABMRT Board of Trustees. The PSABMRT provides two investment options - the Balanced Fund and the Fixed Income Fund. The investment objective of the Balanced Fund is long-term growth and income expected to earn returns comprised of long-term capital appreciation and substantial current income. The objective of the investment strategy is to reduce risk while maximizing returns through the prudent diversification of the portfolio in order to maintain a fully funded status and meet the benefit and expense obligations when due. The Plan's formal Investment Policy Statement which is revised periodically provides more comprehensive details on investment strategy and authorized investments.

The Balanced Fund's investment policy establishes the following target allocation across asset classes:

## NOTES TO THE FINANCIAL STATEMENTS

<u>Asset Class</u>	<u>Target Allocation</u>
US Large Value	12.0%
US Large Core	13.0%
US Large Growth	12.0%
US Mid/Small Equity	8.0%
International Equity	15.0%
Fixed Income	33.0%
Real Estate	7.0%
Cash	<u>0.0%</u>
Total	100.0%

Expected Real Rate of Return - 4.2%. Excludes an inflation expectation of 2.5%.

Long Term Expected Rate of Return Including Inflation - 6.7%

The long-term expected rate of return on the Plan's investments was determined using an asset allocation study conducted by the Plan's investment management consultant in December 2021 in which best-estimate ranges of expected future real rates of return (net of pension plan investment expense and inflation) were developed for each major assets class. These ranges were combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. Best-estimates or arithmetic real rates of return for each major asset class included in the Plan's target asset allocation as of December 31, 2021 are listed in the table above.

### Rate of Return

For the year ended December 31, 2021, the annual money-weighted rate of return on pension plan investments, net of pension plan investment expense, was 13.12 percent. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

### Custodial Credit Risk, Concentration of Credit Risk, Foreign Currency Risk

The Plan held no investments that were exposed to custodial credit risk, concentration of credit risk, or foreign currency risk as of December 31, 2021.

### **Interest Rate Risk**

Interest rate risk is the risk that changes in interest rates that will adversely affect the fair value of an investment or a deposit. Investments in mutual funds, 2a7 like external investment pools are excluded from this requirement. The PSABMRT's formal investment policy states that the portfolio maintained in the Balanced Fund shall be broadly diversified by maturity with the maximum effective maturity of any single security not to exceed 40 years. For the Fixed Income Fund, the portfolio shall be limited to intermediate maturity instruments with effective maturities not to exceed 15 years.

### **Credit Risk**

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. PSABMRT is not rated by a Nationally Recognized Statistical Rating Organization (NRSRO) such as Morningstar, Inc. (Morningstar) or Moody's Investor Services (Moody's), however, PSABMRT's formal investment policy requires that any fixed income security maintained within its portfolio should be rated "BBB-" or higher at the time of purchase by a NRSRO. Asset backed securities, mortgage backed securities, and collateralized mortgage obligations (CMOs) should be rated "AAA" (or its equivalent) at the time of purchase by a NRSRO.

### **NOTE 4 – PENSION LIABILITY**

#### **Net Pension Liability**

The components of the net pension liability of the Plan as of December 31, 2021 were as follows:

Total Pension Liability (TPL)	\$	5,381,328
Plan Fiduciary Net Position	\$	6,189,325
Net Pension Liability (NPL)	\$	(807,997)
Plan Fiduciary Net Position as a Percentage of the Total Pension Liability		115.0%

Update procedures were used to roll forward to the plan's fiscal year ending December 31, 2021. The total pension liability was determined as part of an actuarial valuation at January 1, 2021 and rolled forward to December 31, 2021.

**GETTYSBURG BOROUGH POLICE PENSION PLAN**  
**NOTES TO THE FINANCIAL STATEMENTS**  
**December 31, 2021**

---

**Actuarial Assumptions**

An actuarial valuation of the total pension liability is performed biennially. This report was based upon the Plan's actuarial assumptions, asset valuation method, and cost method as described below:

Actuarial Valuation Date	January 1, 2021
Actuarial Cost Method	Entry Age
Amortization Method	Level Dollar
Remaining Amortization Period	N/A
Asset Valuation Method	Market Value
Assumptions:	
Inflation	2.25%
Salary Increases	4.50%
Investment Rate of Return	7.00% (Net of pension plan investment expense including inflation)
Retirement Age	52 and 25 years of service

Mortality rates were based on the PUBS-2010 Mortality projected 5 years past the valuation date using scale MP-2020.

**Discount Rate**

The discount rate used to measure the total pension liability was 7.00%. The projection of cash flows used to determine the discount rate assumed that plan member contributions will be made at the current contribution rate and that municipal contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based upon the Plan's current target investment allocation and the associated long-term expected investment returns for its asset classes, the Plan's long-term returns may be less than its actuarial discount rate assumption used to determine its pension liability. This may result in future increased total and net pension liability. The actuary recommends that the governing body explore the costs of lowering the actuarial assumed investment rate of return going forward to be more consistent with the plan's anticipated investment returns.

**Net Pension Liability Sensitivity**

The following is a sensitivity analysis of the net pension liability to changes in the discount rate. The table below presents the net pension liability calculated using the discount rate of 7.0% as well as what the net pension liability would be if it were calculated using a discount rate that is 1 percentage point lower (6.0%) or 1 percentage point higher (8.0%) than the current rate.
