# Adams and York County Community Health Needs Assessment 2018 

Overview of the Adams and York Communities

Prepared for and Sponsored by Healthy Adams County and the Healthy York County Coalition

May 2018

Center for
OPINION RESEARCH

May 2018

#### Abstract

This document provides an overview of findings from a community health needs assessment (CHNA) conducted on behalf of Healthy Adams County and the Healthy York County Coalition. The assessment uses information from primary and secondary sources to identify health issues of consequence to the community. Estimates are presented for selected demographic and health indicators, including access to healthcare, healthrelated behavioral risks, and prevention behaviors and context. This CHNA identifies community health needs based on the prevalence of health risks and health disparities. It focuses specifically on health risks that are among the leading causes of death and disability with some emphasis on how these risk factors are unevenly distributed across demographic groups. This approach shows the most significant health risks in Adams and York counties relate to obesity, including obesity-related behaviors such as diet and exercise, and mental health in terms of both the number of people affected and the amount of death and disability each creates.

## Overview and Methods

This document provides an overview of findings from a community health needs assessment conducted on behalf of the Healthy York County Coalition and Healthy Adams County. The assessment uses information from primary and secondary sources to identify health issues of consequence to the community. Estimates are presented for selected demographic and health indicators, including access to healthcare, health-related behavioral risks, and prevention behaviors and context. Appendix A contains a description of the data sources used for the assessment. Appendix B contains the questions respondents were asked for the Healthy York/Healthy Adams Behavioral Risk Factor Survey. Appendix C provides definitions of selected terms. Appendix D contains links to all data tables. Appendix E provides a summary of secondary demographic, employment, housing and income data for both counties. Appendix F contains county health rankings data from the Robert Wood Johnson Foundation County Health rankings.

## Data Sources

The information presented in this summary comes from one of three sources. The primary source of comparative health information is provided by the Robert Wood Johnson Foundation County Health Rankings. These rankings provide county- level information on health factors and health outcomes. The performance of individual counties are compared to other Pennsylvania counties to provide a relative performance ranking. The primary source of local, current information comes from a Community Health Needs Assessment (CHNA) survey. The CHNA survey information is based on a behavioral risk factor survey of 461 adult residents of Adams County and 799 adult residents of York County. The survey interviewing took place from December 4, 2017 through February 25, 2018. The survey sample was designed to be representative of the adult, non-institutionalized population of the two counties. The third source of data comes from the Pennsylvania Department of Health, which is accessed via the EDDIE data retrieval system.

## Community Priorities

This CHNA identifies community health needs based on the prevalence of health risks and health disparities. It focuses specifically on health risks that contribute to non-communicable disease that are among the leading causes of
death and disability with some emphasis on how these risk factors are unevenly distributed across demographic groups. This approach shows the most significant health risks in Adams and York counties relate to obesity, including obesityrelated behaviors such as diet and exercise, and mental health. These conditions are consequential because they effect many residents and because they are related to increased death and disability.

Access indicators are generally favorable, with most residents of both counties reporting they have health care coverage, a personal physician and dental insurance. Still, about one third of residents in each county had some economic hardships and around one in ten skipped medical treatment due to cost. Consequentially, one in four residents of both counties report having a high deductible health plan, which is associated with reduced health care use, and many also believe that mental health services are unaffordable. More positively, the proportion of residents in both counties who need help reading medical information is declining.

Behavioral risk indicators show that few residents exercise regularly or eat three servings of vegetables every day. They also show that more than one in five residents is a current smoker and that around three in four are overweight or obese. ${ }^{\text {i }}$ The continuing decline in physical activity and increases in binge drinking behavior since 2014 are a concern, although the reduction in the proportion of regular smokers is a positive behavioral trend should it continue.

Rates of health conditions such as diabetes, heart conditions, breathing conditions and cancer are not comparatively high, but a plurality of residents has high blood pressure and cholesterol and one in five has been diagnosed with either an anxiety or depressive disorder. Mental health diagnoses continue to rise. Two in five adults say their normal activities have been limited by their health, and that proportion seems to be increasing as well. About two in five residents of both counties experience chronic pain, which is one of the top five causes of disability in the United States.

The health indicators measured by the Behavioral Risk Factor survey remained mostly stable over the past six years, but there are several notable, troublesome trends. Participation in physical activities seems to be declining, while obesity, binge drinking rates, and mental health issues seem to be increasing.

Economic hardships and skipping care because of costs has remained stable despite low unemployment and favorable economic growth.

There are notable health disparities within Adams and York counties. Poverty is significantly associated with differential outcomes related to access, conditions, and prevention behaviors. Age is significantly associated with differential outcomes related to all indicator groups. Importantly, these patterns are persistent, in that there are few changes in which groups experience disparities compared to 2011 or 2014. Public health researchers now frequently attribute these persistent patterns in health disparities to a set of social determinants. Analysis of secondary data shows that both counties have identifiable social problems that contribute to the persistent health disparities evident in the BRFSS data. Adams and York counties have large numbers of renters struggling with housing affordability; high rates of poverty, particularly for minorities; large income disparities between whites and non-whites; low rates of post-secondary educational attainment; and for York County, low rates of college attendance among 18-24 year olds. Both counties also have aging populations. Finally, both counties' physical environments are rated among the poorest in the state. Adams County's physical environment score places it 60 out of the state's 67 counties. York County's physical environment is rated at 65 of 67 counties.

## Behavioral Risk Factor Survey

The Behavioral Health Risk Factor survey allows us to review a variety of health indicators specific to each county. These indicators fall into the broad categories of health care access, behavioral risk, health conditions, and prevention behaviors and context. Altogether, these indicators show that poor diet, lack of physical activity, obesity, and mental health concerns affect many residents in both counties (Table 1).

Access indicators are generally favorable, with most residents of both counties reporting they have health care coverage, a personal physician
and dental insurance (see Table 1). Still, about one third of residents in each county had some economic hardships and around one in ten skipped medical treatment due to cost. Consequentially, one in four residents of both counties report having a high deductible health plan, which is associated with reduced health care use, and many also believe that mental health services are unaffordable. More positively, the proportion of residents in both counties who need help reading medical information is declining.

Behavioral risk indicators show that few residents exercise regularly or eat three servings of vegetables every day. They also show that more than one in five residents is a current smoker and that around three in four are overweight or obese. The continuing decline in physical activity and increases in binge drinking behavior since 2014 are a concern, although the reduction in the proportion of regular smokers is a positive behavioral trend should it continue.

Rates of health conditions such as diabetes, heart conditions, breathing conditions and cancer are not comparatively high, but a plurality of residents has high blood pressure and cholesterol and one in five has been diagnosed with either an anxiety or depressive disorder. Mental health diagnoses continue to rise. Two in five adults say their normal activities have been limited by their health, and that proportion seems to be increasing as well. About two in five residents of both counties experience chronic pain, which is one of the top five causes of disability in the United States.

The health indicators measured by the Behavioral Risk Factor survey remained mostly stable over the past six years, but there are several notable, troublesome trends. Participation in physical activities seems to be declining, while obesity, binge drinking rates, and mental health issues seem to be increasing. Economic hardships and skipping care because of costs has remained stable despite low unemployment and favorable economic growth.

Table 1. Summary of Health Indicators, BFRSS

|  | York |  |  | Adams |  |  |

| Has an anxiety disorder | 18\% | 21\% | 23\% | 16\% | 16\% | 22\% |
| Has a depressive disorder | 20\% | 21\% | 25\% | 20\% | 20\% | 22\% |
| PHQ-8 current depression indicator-currently depressed | 9\% | 9\% | 13\% | 8\% | 6\% | 10\% |
| Suffers from chronic pain | --- | --- | 42\% | --- | --- | 37\% |
| Received care for emotions/nerves/mental health in past year | --- | --- | 13\% | --- | --- | 15\% |
| Prevention Behaviors and Context |  |  |  |  |  |  |
| At least one day physical health was not good in past month | 39\% | 39\% | 45\% | 40\% | 34\% | 43\% |
| At least one day mental health was not good in past month | 45\% | 38\% | 40\% | 39\% | 38\% | 34\% |
| Poor health limited participation in normal activities in past month | 36\% | 40\% | 42\% | 38\% | 43\% | 43\% |
| Visited doctor for routine checkup in year | 69\% | 74\% | 76\% | 74\% | 75\% | 79\% |
| Visited dentist in past year | 76\% | 74\% | 73\% | 77\% | 72\% | 68\% |
| Has ever had blood cholesterol checked | 82\% | 80\% | 82\% | 83\% | 79\% | 80\% |
| Gets needed social and emotional support | 92\% | 93\% | 93\% | 94\% | 91\% | 95\% |
| One or more days with depressive symptoms in past two weeks | 61\% | 59\% | 64\% | 58\% | 55\% | 59\% |
| Stressed about paying rent or mortgage | 27\% | 24\% | 22\% | 30\% | 21\% | 20\% |
| *Estimated Sample Errors (Unweighted): Total $n=1260,3.2 \%$; Adams $n=467,5.2 \%$; York $n=793,4.0 \%$ |  |  |  |  |  |  |

## Residents Affected

The estimates produced by the Behavioral Risk Factor survey provide a tool for translating the proportion of citizens with a specific characteristic into an estimate of the number of adult residents with that characteristic. In aggregate terms, diet, exercise, obesity, and mental health issues affect large numbers of county residents. In Adams County, more than 58,000 adult residents are overweight or obese;
more than 47,000 had one or more days with depressive symptoms in the two weeks preceding the survey; nearly 35,000 are limited in their daily activities by poor health; and about 30,000 suffer from chronic pain (Figure 1). More than 14,000 adults in Adams County smoke and almost 13,000 binge drink.

Figure 1. Total Adult Residents Reporting Condition, Adams County 2018. The blue bars provide estimates of the adult population in 2018 that reported each behavior, condition, or experience. In Adams County, more than 58,000 adult residents are overweight or obese; more than 47,000 had one or more days with depressive symptoms; nearly 35,000 are limited in their daily activities by poor health; and about 30,000 suffer from chronic pain. More than 14,000 adults in Adams County smoke and almost 13,000 binge drink. The estimated error for these estimates is $\pm 4,196$ adults (Total number of adult residents in Adams County is 80,695).

In York County, more than 245,000 adult residents are overweight or obese; more than 218,000 had one or more days with depressive symptoms in the two weeks preceding the survey; 143,000 are limited in their daily
activities by poor health; and about the same number suffer from chronic pain (Figure 2). More than 64,000 adults in Adams County smoke and binge drink.

Figure 2. Total Adult Residents Reporting Condition, York County 2018. The blue bars provide estimates of the adult population in 2018 that reported each behavior, condition, or experience. In York County, more than 245,000 adult residents are overweight or obese; more than 218,000 had one or more days with depressive symptoms in the two weeks preceding the survey; 143,000 are limited in their daily activities by poor health; and about the same number suffer from chronic pain (Figure 2). More than 64,000 adults in Adams County smoke and binge drink. The estimated error for these estimates is $\pm 13,659$ adults (Total number of adult residents in York County is 341,468 ).

## Health Risks and Disability-Adjusted Life Years

Long-term health risk and disability can be quantified by calculating disability-adjusted life years. Disability-adjusted life years (DALYs) calculations provide an estimate of the burden of disease by assessing premature mortality and
disability, thus providing an overall view of the most important contributors to health loss. In the United States, the leading causes of DALYs were all non-communicable diseases: heart disease, COPD, lung cancer, and major
depressive disorders. The rates of these major causes of death and disability for Adams and

York counties, Pennsylvania, and the US are shown in Table 2.

Table 2. Leading Causes of Death, Age-Adjusted Rates per 100,000

|  | Adams $^{\text {a }}$ | York $^{\text {a }}$ | Pennsylvania $^{\text {a }}$ | U.S. $^{\text {b }}$ |
| :--- | :---: | :---: | :---: | :---: |
| Heart disease | 150.2 | 154.7 | 177.8 | 168.5 |
| Cancer | 144.5 | 170.5 | 167.2 | 158.5 |
| Accidents | 58.0 | 55.2 | 52.0 | 41.6 |
| Stroke | 36.4 | 40.6 | 38.8 | 37.6 |
| Chronic lower respiratory diseases | 32.5 | 33.5 | 38.1 | 43.2 |
| Alzheimer's disease | 33.7 | 26.6 | 21.0 | 21.3 |
| Diabetes mellitus | 30.7 | 23.8 | 22.1 | 21.3 |
| Kidney Disease | 9.4 | 14.2 | 16.9 | 13.4 |
| Influenza and pneumonia | 12.6 | 14.4 | 15.9 | 15.2 |
| Septicemia | 10.2 | 11.6 | 13.5 | 11.0 |

a. 2016 Age-adjusted rate; Source: https://www.phaim1.health.pa.gov/EDD/WebForms/DeathCntySt.aspx b. 2015 Age-adjusted rate; Source: https://www.cdc.gov/nchs/pressroom/states/pennsy/vania/pennsy/vania.htm

The disability-adjusted life years (DALYs) estimates might encourage a focus on these conditions, but focusing on these conditions would do little to reduce lives lost and disability within a community. Instead, a public health focus on reducing DALYs encourages the prevention of disease instead of its treatment. Even though the specific conditions affect a small segment of the population, the risk factors that account for the most disease burden in the United States are dietary risks, smoking, and high BMI. Each contributes to cancer, cardiovascular and circulatory disorders, chronic respiratory diseases, and diabetes.ii

Residents of Adams and York counties have better comparative rates of smoking and binge drinking compared to adults in the state, but they also have higher rates of hypertension, hypercholesterolemia, and obesity. The differences between the state and the two counties on these behavioral indicators may be attributed to Adams and York counties having a relatively older population than the state, which is discussed in a later section of this report. Neither county meets the Healthy People 2020 targets for smoking (12\%) or obesity (30.5\%), although both outperform the target for binge drinking (24.2\%).iii

Figure 3. Behavioral Health Risks, Adams and York Counties 2018 Compared to PA Estimates. This figure compares the prevalence of health risks in Adams and York Counties to Pennsy/vania. Although both counties have rates similar to the state, the rates for smoking and obesity do not meet health goals set by the Centers for Disease Control.

## Health Disparities

The CHNA identifies the presence of numerous health disparities, i.e., gaps in access, conditions, or behaviors that are larger for some demographic groups than for others. The area's health disparities, generally speaking, show clear patterns. First, poverty is significantly associated with differential outcomes related to access, conditions, and prevention behaviors. Second, age is significantly associated with differential outcomes related to all indicator groups. Third, these patterns are persistent, in that there are few changes in which groups experience disparities compared to 2011 or 2014. Figure 4 displays the relationships that exist between each survey indicator and demographic information such as poverty status, race and ethnicity, gender, and age (Appendix D provides cross tabulations that show the estimate of each indicator within each subgroup). The color coding identifies whether there is a significant relationship between each indicator and each demographic subgroup and how strong those differences are; the darkest coloring indicates the strongest associations.

Public health researchers now frequently attribute these persistent patterns in health disparities to a set of social determinants. Social determinants thinking suggests that health is determined by access to social and economic opportunities that arise from the places where we learn, live, and work. According to the Centers for Disease Control (CDC), "The conditions in which we live explain in part why some Americans are healthier than others and why Americans more generally are not as healthy as they could be."iv As such, the CDC has established a set of indicators that can track
progress towards a goal of creating social and physical environments that promote good health for all people.

The analysis of secondary data that appears in in Appendix $E$ provides data on a number of important indicators useful for judging social determinants indicators for each county. Both counties have identifiable social problems that contribute to the persistent health disparities evident in the BRFSS data. Adams and York counties have large numbers of renters struggling with housing affordability (Table A2); high rates of poverty, particularly for minorities (Table C3); large income disparities between whites and non-whites (Table C2); low rates of post-secondary educational attainment (Table E1); and for York County, low rates of college attendance among 18-24 year olds (Table E2). Both counties also have aging populations (Table A2).

The analysis of Robert Wood Johnson County Health Rankings data that follows in the next section of this report also provides data about place, specifically the physical environment. Adams County's physical environment score, which includes indicators of air and water quality, places it 60 out of the state's 67 counties. York County's physical environment is rated at 65 of 67 counties.

| Results of Significance Testing for Selected Variables |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Demographic Groups |  |  |  |
|  | Poverty | Race/Eth | Gender | Age |
| Access Indicators |  |  |  |  |
| Has health care coverage |  |  |  |  |
| Has a personal physician |  |  |  |  |
| Did not receive health care in past year because of cost |  |  |  |  |
| Has dental insurance |  |  |  |  |
| Economic hardships |  |  |  |  |
| Has a high deductible health plan |  |  |  |  |
| Does not know how to find a mental health provider |  |  |  |  |
| Agrees mental health care services are unaffordable |  |  |  |  |
| Needs help reading materials from doctor/hospital |  |  |  |  |
| Lack of transportation barrier to receiving health care |  |  |  |  |

Figure 4. Health Indicators by Selected Demographic Groups, Adams and York Counties, 2018. This figure displays the relationships between each survey indicator and poverty status, race and ethnicity, gender, and age. The color coding identifies whether there is a significant relationship between each indicator and each demographic subgroup and how strong those differences are; the darkest coloring indicates the strongest associations.

## Relative Health Rankings

Adams County ranks 10 out of 67 counties in health outcomes and 11 out of 67 counties in health factors, according to county health rankings datav. Compared to other counties in the state, Adams shows low rates of dentists, mental health providers, access to exercise facilities, and college attainment (Appendix F). Adams also has relatively high rates of motor vehicle deaths, poor physical health days, and severe housing issues. Adams does
relatively well on having low rates of children in poverty, excessive drinking, premature death, preventable hospital stays, and unemployment. Adams County's physical environment scores have declined significantly over time relative to other counties in the state, while there has been some improvement on quality of life and health behavior scores (Figure 5).

Figure 5. Relative Health Rankings, Adams County, 2018. This figure displays the trends in the relative ranking of Adams County since 2014 on the health outcomes and factors measured by the County Health Rankings. Adams County's physical environment scores have declined significantly over time relative to other counties in the state, while there has been some improvement on quality of life and health behavior scores. Figure created by the Center for Opinion Research using Robert Wood Johnson Foundation County Health Rankings data.

York County ranks 19 out of 67 counties in health outcomes and 13 out of 67 counties in health factors. Compared to other counties in the state, York shows high rates of obesity, low birth weight babies, teen births, and low rates of mental health providers (Appendix F). York also has relatively high rates of sexually transmitted infections and violent crime. York County does
relatively well on having low rates of children in poverty and preventable hospital stays. York County's physical environment scores have declined significantly over time relative to other counties in the state, while there has been some improvement on health behavior scores (Figure 6).

Adams and York County Community Health Needs Assessment Summary Report 2018

Figure 6. Relative Health Rankings, York County, 2018. This figure displays the trends in the relative ranking of York County since 2014 on the health outcomes and factors measured by the County Health Rankings. York County's physical environment scores have declined significantly over time relative to other counties in the state, while there has been some improvement on health behavior scores. Figure created by the Centerfor Opinion Research wingRobert Wood Johnson Foundation County Health Rankings data.

The relative performance of Adams and York counties on the grouped indicators reveals the indicator groups that need the greatest improvement (Table 3). Both counties receive their poorest relative rankings for the physical environment, which includes poor air quality and problems related to housing and transportation (see Appendix F). Quality of life indicators, which
includes mental and physical health indicators, are the second lowest performing set of factors for both counties. The third area of concern relates to health behaviors, which are risk factors for chronic diseases. Table 3 displays the health outcomes and factors for Adams and York counties as well as the same ranks for the top performing counties in Pennsylvania.

Table 3. Relative County Ranks on County Health Rankings Outcomes and Factors

|  | Length of Life | Quality of Life | Health Behaviors | Clinical Care | Social \& Economic Factors | Physical Environment |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| County |  |  |  |  |  |  |

## Endnotes

${ }^{i}$ The survey found that $51 \%$ of those with a BMI in the overweight category wrongly believe their weight is "about average." Most of those in the normal ( $86 \%$ ) and obese ( $83 \%$ ) BMI groups correctly classified their weight.

## Description of Data Sources

The primary source of local, current data about Adams and York Counties comes from a Community Health Needs Assessment (CHNA) survey. The CHNA survey information is based on a behavioral risk factor survey of 461 adult residents of Adams County and 799 adult residents of York County. The survey interviewing took place from December 4, 2017 through February 25, 2018. The survey sample was designed to be representative of the adult, non-institutionalized population of the two counties. Survey results were weighted (gender, education, race and age) using an iterative weighting algorithm to reflect the known distribution of those characteristics as reported by the American Community Survey for Adams and York Counties (see Table A-1).

The sample error is +/- 5.2 percentage points for Adams County and is +/- 4.0 percentage points for York County when the design effects from weighting are considered. In addition to sampling error, this poll is also subject to other sources of non-sampling error. Generally speaking, two sources of error concern researchers most. Non-response bias is created when selected participants either choose not to participate in the survey or are unavailable for interviewing. Response errors are the product of the question and answer process. Surveys that rely on self-reported behaviors and attitudes are susceptible to biases related to the way respondents process and respond to survey questions.

Table A-1. Unweighted and Weighted Sample Estimates, Weighting Variables and Selected Health Indicators

| Group | Parameter | Unweighted Estimate | Weighted Estimate |
| :---: | :---: | :---: | :---: |
| Weighting Variables |  |  |  |
| Male | 48.8 | 48.5 | 48.8 |
| Female | 51.2 | 51.4 | 51.2 |
| HS or < | 51.8 | 38.1 | 51.8 |
| some college | 24.5 | 27.2 | 24.5 |
| College or > | 23.7 | 34.7 | 23.7 |
| White | 91.5 | 93.1 | 91.5 |
| Other | 8.5 | 6.9 | 8.5 |
| 18-34 | 26.3 | 19.2 | 26.3 |
| 35-54 | 35.0 | 30.8 | 35.0 |
| 55 or older | 38.8 | 50.0 | 38.7 |
| Health Indicators |  |  |  |
| Smoker | 17\% | 16\% | 19\% |
| Obese | 35\% | 36\% | 36\% |
| Binge Drink | 11\% | 16\% | 18\% |
| Diabetes | 13\% | 14\% | 13\% |
| Asthma (current) | 14\% | 10\% | 11\% |
| No provider | 10\% | 12\% | 16\% |
| Phys health not good 1+ day in past month | 32\% | 44\% | 45\% |
| Mental health not good 1+ day in past month | 35\% | 36\% | 38\% |
| No Insurance 18-64 | 10\% | 9\% | 10\% |

Note: age, county, gender, race estimates are from U.S. Census Bureau, 2012-2016 American Community Survey 5-Year Estimates; health indicators are for York County only and come from the state's EDDIE system for years 2014-2016. http://www.statistics.health.pa.gov/StatisticalResources/EDDIE/Pages/EDDIE.aspx

The primary source of comparative health information is provided by the Robert Wood Johnson Foundation County Health Rankings. These rankings provide county-level information on health factors and health outcomes. Table A2 provides a list of the measures used by the County Health Rankings.

The third source of data comes from the Pennsylvania Department of Health, which is accessed via the EDDIE data retrieval system. The trend data that appears in Appendix $D$ is based on the data available through this web portal and includes the Commonwealth of Pennsylvania's behavioral risk factor surveillance system (BRFSS) survey and other health
statistics. The BRFSS data displayed in the Pennsylvania EDDIE system that was used to compile the trend data, starting in 2002, includes data gathered by Pennsylvania collecting samples of behavioral risk information for Local Health Partnerships at the county level. Due to the inclusion of these sample data, analysis of Pennsylvania BRFSS data presented by others may differ in sample sizes and have slightly different percent estimates and confidence bounds. Other health statistics gathered from
the site were analyzed by Center for Opinion Research staff. The Department of Health specifically disclaims responsibility for any analyses, interpretations, or conclusions. In some circumstances, data for Adams County is missing due to a low number of events in a given year. The relatively small size of Adams County can produce estimates in some instances that are statistically unreliable and small changes in the number of events can produce apparently large changes in reported rates.

## Demographic Characteristics

The survey is representative of the adult population of York and Adams Counties. This table shows the demographic characteristics of the survey sample.

The survey estimates are similar to the counties' known distributions of these demographic characteristics.

## Marginal Frequency Report: Behavioral Risk Factor Survey

## Health Status

S1_1. Would you say that in general your health is...

|  | Adams |  |  | York |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | $\mathbf{2 0 1 1}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 7}$ | $\mathbf{2 0 1 1}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 7}$ |
| Excellent, | $\mathbf{1 5 \%}$ | $17 \%$ | $\mathbf{1 4 \%}$ | $16 \%$ | $17 \%$ | $\mathbf{1 5 \%}$ |
| Very good, | $35 \%$ | $36 \%$ | $\mathbf{4 0 \%}$ | $41 \%$ | $35 \%$ | $36 \%$ |
| Good, | $34 \%$ | $31 \%$ | $30 \%$ | $28 \%$ | $31 \%$ | $34 \%$ |
| Fair, or | $13 \%$ | $12 \%$ | $9 \%$ | $11 \%$ | $13 \%$ | $\mathbf{1 3 \%}$ |
| Poor | $3 \%$ | $4 \%$ | $\mathbf{6 \%} \%$ | $3 \%$ | $4 \%$ | $\mathbf{3 \%}$ |

## Healthy Days - Health Related Quality of Life

S2_1. Now thinking about your physical health, which includes physical illness and injury, for how many days during the past 30 days was your physical health NOT good?

|  | Adams |  |  | York |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  | $\mathbf{2 0 1 1}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 7}$ | $\mathbf{2 0 1 1}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 7}$ |
| None | $60 \%$ | $66 \%$ | $\mathbf{5 7 \%}$ | $61 \%$ | $61 \%$ | $55 \%$ |
| 1 or more days | $40 \%$ | $34 \%$ | $\mathbf{4 3 \%}$ | $39 \%$ | $39 \%$ | $\mathbf{4 5 \%}$ |

S2_1cp. Do you suffer from any type of chronic pain, that is, pain that occurs constantly or flares up frequently?

|  | Adams | York |
| :---: | :---: | :---: |
|  | 2017 | 2017 |
| Yes | 37\% | 42\% |
| No | 63\% | 58\% |

S2_1med. Are you currently taking any opioid or narcotic prescription medications for your pain?

|  | Adams | York |
| :--- | :---: | :---: |
|  | $\underline{\mathbf{2 0 1 7}}$ | $\underline{\mathbf{2 0 1 7}}$ |
|  | $\underline{n=171}$ | $\mathrm{n}=336$ |
| Yes | $12 \%$ | $13 \%$ |

Definitions of Selected Terms

Age-adjusted Rate: Age-adjustment is the process by which differences in the age composition of two or more populations are removed, to allow comparisons between these populations in the frequency with which an age-related health event occurs. ${ }^{1}$

ALA Grades: The American Lung Association grades counties in which the EPA has placed the necessary monitoring equipment and creates weighted annual averages for both high ozone days and high particle pollution days.

Binge Drinker: Males having five or more drinks on one occasion or females having four or more drinks on one occasion. ${ }^{1}$

Body Mass Index (BMI): Number calculated from a person's weight and height. BMI provides a reliable indicator of body fatness for most people and is used to screen forweight categories that may lead to health problems. ${ }^{2}$

Confidence Intervals: Interval determining the variability of a rate, ratio or percent. ${ }^{1}$
Current smoker: During Center for Opinion Research (COR) interviewing, respondents who said they had smoked more than 100 cigarettes in their life were asked about the frequency of their current smoking habits. If the respondent confirmed to smoking occasionally or every day, they were labeled as smokers.

Days with depressive symptoms: During COR interviewing, respondents were asked a series of questions relating to their mood over the past month. These questions each received values that were then compiled to create a composite score for days with depressive symptoms.

Depressive symptoms: Depression calculations were made using the PHQ-8 scale. ${ }^{6}$
Economic hardships: During COR interviewing, respondents were asked a series of questions relating to economic hardships experienced within the past year, such as falling behind on rent payments or being unable to pay for food, utilities, gasoline or medical care. These questions each received values that were then compiled to create a composite score for economic hardships experienced in the past year.

Gets needed social and emotional support: During COR interviewing, respondents were asked how often they received the social and emotional support they need. If respondents answered "Always", "Usually" or "Sometimes", they were marked as getting needed social and emotional support. If they answered "Rarely" or "Never", they were marked as not getting needed support.

Healthy literacy: During COR interviewing, respondents were asked a series of questions relating to their own confidence in understanding medical information, which was used to create a composite score that determined the threshold of health literacy.

Healthy People 2020: Healthy People provides science-based, 10-year national objectives for improving the health of all Americans. ${ }^{3}$

Limited Access to Care: Any respondent who responded "yes" to any of three questions was classified as having limited access to care. The questions were: Has a lack of transportation kept you from getting to a doctor's office or to any other health care appointment during the PAST YEAR? Were you unable to get needed MEDICAL CARE because you couldn't afford it during the last 12 months? Did you lack health insurance coverage during the last 12 months?

Low birth Weight: Birth weight of less than 2,500 grams. ${ }^{4}$
Obese: Has a BMI over $30 .{ }^{1}$
Overweight: Has a BMI between 25 and $30 .{ }^{1}$
Physical activity: During COR interviewing, respondents were marked as engaging in physical activity
if the respondent said to have exercised at least 30 minutes on five days of the past week.
Poverty Status of Household: During COR interviewing, respondents were asked to indicate their income level, as well as the number of people in their household. Three categories of poverty status (in poverty, low-income and other) were created based on the 2017 US Department of Health and Human Services (HSS) Poverty Guidelines. The category "In Poverty" was created based on these guidelines. Respondents were marked as "Low- income" if their income level fell within 100\% and $200 \%$ of the HSS guidelines. ${ }^{5}$

Rate: A rate is a measure of the frequency of an event per population unit. The use of rates, rather than raw numbers, is important for comparison among populations, since the number of events depends, in part, on the size of the population. ${ }^{1}$

Statistical significance: The difference between two independent rates is statistically significant if the confidence intervals for two independent rates do not overlap. ${ }^{1}$

Stressed about paying for food: During COR interviewing, respondents were asked how often in the past 12 months they were stressed about having enough money to buy nutritious meals. If they answered "Always", "Usually" or "Sometimes", as opposed to "Rarely" or "Never", they were marked as being stressed about paying for food.

Stressed about paying for rent or mortgage: During COR interviewing, respondents were asked how often in the past 12 months they were stressed about having enough money to pay their rent or mortgage. If they answered "Always", "Usually" or "Sometimes", as opposed to "Rarely" or "Never", they were marked as being stressed about paying rent or mortgage.

Substance Use: Respondents classified in the substance use category reported binge drinking, use of non-prescribed painkillers, stimulants, or tranquilizers, or use of marijuana 20 or more times in the past 20 days.

Unemployed persons: Persons aged 16 years and older who had no employment during the reference week, were available for work, except for temporary illness, and had made specific efforts to find employment sometime during the 4 -week period ending with the reference week. Persons who were waiting to be recalled to a job from which they had been laid off need not have been looking for work to be classified as unemployed. ${ }^{4}$

Unemployment rate: The unemployment rate represents the number unemployed as a percent of the labor force. ${ }^{4}$

Vegetable Consumption: During COR interviewing, respondents were asked how many servings of vegetables they had eaten during the past week, to determine whether they consumed three or more servings of vegetables per day on average during that week.

Appendix E: Secondary Data Summary

## Overview - Adams County

All data in the tables below are extracted from Census Bureau American Community Survey (ACS) 1-year and 5-year estimates, except where noted. Since all ACS data is survey based, all of the estimates provided in this report are subject to sampling error. This report uses ACS 5-year survey estimates whenever possible because the data has larger sample sizes, which produces more precise estimates due to smaller sampling error. When population subgroups are particularly small, readers are reminded that large year-to-year changes in the estimates may be a result of sampling variability. All monetary values in the tables are expressed in 2016 inflation-adjusted dollars, using the CPI index for all urban consumers.

## Demographic Statistics

## A. Population Statistics

## Total Population

The population of Adams County is growing at a very slow rate, one that is close to that of Pennsylvania. Both areas' population growth rates are significantly below that of the nation as a whole (Table A1).

## Population Shares by Age

Adams County has an older population than both the state and the nation, and this trend appears to be intensifying. In recent years, the share of children in Adams County has dropped faster than it has in Pennsylvania and the United States, and Adams' share of persons 65 years and older has increased more than in these comparison areas (Table A2).

## Share of Population by Race and Ethnicity

White persons comprise over $95 \%$ of the population of Adams County. The share of the population that is Latino has grown by about 1\% since 2010 (Table A3).

## B. Household Statistics

## Households by Occupancy

Like Pennsylvania, the share of vacant housing units in Adams County is increasing, a trend that contrasts with that of the nation as a whole. A higher share of households in Adams County own their homes (78\%) when compared to the state (69\%) and the nation (64\%). The rate of
homeownership in Adams County has increased in recent years, unlike in these comparison areas (Table B1).

## Housing Characteristics

While relatively few Adams County households are renting their home, $50 \%$ of those that do rent face a housing affordability problem. For homeowners in Adams County (and the state and the nation), the housing affordability picture has improved in recent years. Housing values in Adams County and Pennsylvania have declined between these two reference periods, in contrast to the small increase in median value that took place in the U.S. as a whole (Table B2).

## Households by Type

The share of non-family households has increased in Adams County, driven by an increase in older residents who live alone. This trend fits the age distribution patterns shown above, and is taking place in Adams County at a faster pace than in Pennsylvania and the United States as a whole (Table B3).

## C. Income Statistics

## Household and Family Income

Adams county households have experienced modest income growth in recent years. The income distribution in Adams County has a larger share of middle-income households, and relatively fewer households with very low or high incomes (Table C1).

## Median Household Income by Race and Ethnicity

There are notable disparities in income by race and ethnicity, in Adams County as well as statewide and nationally (Table C2).

## Poverty

Overall, poverty rates in Adams County are lower than Pennsylvania and the United States. However, the poverty rate increased for most groups in Adams County between these two reference periods, with the exception of those 65 and older. The rate of poverty for married couple families with children changed from being below that of the state in 2009-13, to being higher than the statewide rate in 2012-16 (Table C3).

## Households with Supplemental Benefits in the Past 12 Months

Adams County experienced an increase in poverty between the 2009-13 and 2012-16 periods, and more households in the county received the assistance of supplemental security income and food stamps/SNAP benefits (Table C4).

## D. Employment Statistics

## Employment Status of the Population 16 Years and Older

Adams County's unemployment rate has steadily declined since the recessionary peak reached in 2010, and its rate has consistently been below those of the United States and Pennsylvania (Table D1).

## Means of Transportation to Work

Most workers in Adams County drive alone to their places of employment. The average commute for Adams County workers has remained essentially unchanged in recent years (Table D2).

## Employment by Occupation

Jobs in Adams County have been shifting away from construction occupations ( $-1.5 \%$ ) and into a variety of service occupations, such as management/business ( $+0.7 \%$ ) and health care ( $+1.0 \%$ ). Farming occupations have increased their share of employment in Adams County as well, by $+0.6 \%$ (Table D3).

## Employment by Class of Worker

Employment in Adams County has shifted away from the public sector ( $-1.7 \%$ of workers) and the self-employed ( $-0.6 \%$ of workers) and into the private sector (+2.3\%). Similar employment trends have taken place in the United States and Pennsylvania (Table D4).

## Employment by Industry Sector

Adams County has seen jobs shift out of the construction and manufacturing sectors in the prior decade. Local government and retail jobs also have a smaller share of employment in Adams County in 2016, compared to 2006. Expanding industry sectors in Adams County include Health Care (+1.7\%) Administrative and Waste Disposal (+1.3\%), Professional, Science, and Technical Services ( $+1.0 \%$ ), and Entertainment, Food Service, and Accommodation (+1.0\%) (Table D5).

## E. Education Statistics

## Educational Attainment of the $25+$ Population

In general, adults in Adams County have lower levels of educational attainment than those in Pennsylvania and the United States. However, educational attainment in Adams County is improving, and this improvement is happening at similar rates to these comparison areas (Table E1).

## School Enrollment

Rates of school enrollment in Adams County have improved for children of all ages (3-17). Rates of college enrollment have dropped for those ages 18-24 in Adams County, although women of this age group continue to be enrolled in college at a rate similar to that of Pennsylvania, and higher than the U.S. rate (Table E2).

## G. Health Care Access Statistics

## Health Insurance Coverage

The number, and share, of Adams County residents with health coverage has increased in recent years, especially for those ages 18-44. The uninsured rate for Adams County has decreased from 9.4\% in 2009-13 to 7.4\% in 2012-16 (Table G1).

Table A1: Total Population

|  | United States |  |  | Pennsylvania |  |  | Adams County |  |  |

| Occupied units paying rent | 40,534,516 | 42,835,169 | 2,300,653 | 1,495,915 | 1,536,223 | 40,308 | 8,883 | 8,510 | -373 |
| Median monthly rent (2016 dollars) | \$931 | \$949 | \$18 | \$838 | \$859 | \$21 | \$845 | \$847 | \$2 |
| Households spending $30 \%$ or more of income on rent | 52.3\% | 51.1\% | -1.2\% | 50.2\% | 49.6\% | -0.6\% | 49.4\% | 50.3\% | 0.9\% |

While relatively few Adams County households are renting their home, $50 \%$ of those that do rent face a housing affordability problem. For homeowners in Adams County (and the state and the nation), the housing affordability picture has improved in recent years. Housing values in Adams County and Pennsylvania have declined between these two reference periods, in contrast to the small increase in median value that took place in the U.S. as a whole. (Click here to return to text)

Table B3: Households by Type

|  | United States |  |  | Pennsylvania |  |  | Adams County |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2009-13 | 2012-16 | change | 2009-13 | 2012-16 | change | 2009-13 | 2012-16 | change |
| Total households | 115,610,216 | 117,716,237 | 2,106,021 | 4,958,427 | 4,961,929 | 3,502 | 38,141 | 38,269 | 128 |
| Average household size | 2.63 | 2.64 | 0.01 | 2.48 | 2.49 | 0.01 | 2.55 | 2.55 | 0.00 |
| Average family size | 3.22 | 3.24 | 0.02 | 3.09 | 3.10 | 0.01 | 2.98 | 2.99 | 0.01 |
| Shares of all households that are: |  |  |  |  |  |  |  |  |  |
| Family households | 66.4\% | 65.9\% | -0.5\% | 64.8\% | 64.4\% | -0.4\% | 72.1\% | 71.4\% | -0.7\% |
| Male householder, no wife | 4.7\% | 4.8\% | 0.1\% | 4.3\% | 4.4\% | 0.2\% | 4.4\% | 3.8\% | -0.6\% |
| Female householder, no husband | 13.0\% | 12.9\% | -0.1\% | 11.9\% | 11.9\% | 0.0\% | 9.3\% | 9.9\% | 0.5\% |
| Married-couple families | 48.7\% | 48.2\% | -0.5\% | 48.6\% | 48.0\% | -0.6\% | 58.3\% | 57.7\% | -0.6\% |
| Nonfamily households | 33.6\% | 34.1\% | 0.5\% | 35.2\% | 35.6\% | 0.4\% | 27.9\% | 28.6\% | 0.7\% |
| Householder living alone | 27.5\% | 27.7\% | 0.2\% | 29.5\% | 29.6\% | 0.1\% | 23.0\% | 24.0\% | 1.0\% |
| 65 years and over, living alone | 9.8\% | 10.4\% | 0.6\% | 11.8\% | 12.2\% | 0.4\% | 10.2\% | 11.3\% | 1.1\% |

The share of non-family households has increased in Adams County, driven by an increase in older residents who live alone. This trend fits the age distribution patterns shown above, and is taking place in Adams County at a faster pace than in Pennsylvania and the United States as a whole. (Click here to return to text)

Table C1: Household and Family Income (Inflation-Adjusted 2016 Dollars)

|  | United States |  |  | Pennsylvania |  |  | Adams County |  |  |

| With related children under 18 years | 40.0\% | 39.7\% | -0.3\% | 39.5\% | 39.0\% | -0.5\% | 30.8\% | 35.0\% | 4.2\%* |
| With related children under 5 years | 52.7\% | 51.7\% | -1.0\% | 52.4\% | 50.6\% | -1.8\% | 51.5\% | 50.5\% | -1.1\%* |
| All People | 15.4\% | 15.1\% | -0.3\% | 13.3\% | 13.3\% | 0.0\% | 8.7\% | 9.4\% | 0.7\% |
| Individual poverty by age |  |  |  |  |  |  |  |  |  |
| Under 18 years | 21.6\% | 21.2\% | -0.4\% | 18.8\% | 19.1\% | 0.3\% | 14.4\% | 15.5\% | 1.1\% |
| 18-64 years | 14.3\% | 14.2\% | -0.1\% | 12.6\% | 12.7\% | 0.1\% | 7.5\% | 8.4\% | 0.9\% |
| 65 years and over | 9.4\% | 9.3\% | -0.1\% | 8.3\% | 8.1\% | -0.2\% | 5.7\% | 5.5\% | -0.2\% |
| Individual poverty by race |  |  |  |  |  |  |  |  |  |
| Black | 27.1\% | 26.2\% | -0.9\% | 28.6\% | 28.2\% | -0.4\% | 17.7\% | 21.5\% | 3.8\%* |
| Latino | 24.7\% | 23.4\% | -1.3\% | 32.3\% | 31.5\% | -0.8\% | 33.8\% | 36.0\% | 2.2\%* |
| White non-Latino | 10.6\% | 10.6\% | 0.0\% | 9.6\% | 9.6\% | 0.0\% | 6.6\% | 7.2\% | 0.6\% |

Overall, poverty rates in Adams County are lower than Pennsylvania and the United States. However, the poverty rate increased for most groups in Adams County between these two reference periods, with the exception of those 65 and older. The rate of poverty for married couple families with children changed from being below that of the state in 2009-13, to being higher than the statewide rate in 2012-16. (Click here to return to text)
*Note: Some poverty rate estimates above are based on relatively small sample sizes, which is important to consider when interpreting change over time.
Table C4: Households with Supplemental Benefits in the Past 12 Months

|  | United States |  |  | Pennsylvania |  |  | Adams County |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2009-13 | 2012-16 | change | 2009-13 | 2012-16 | change | 2009-13 | 2012-16 | change |

Adams County has seen jobs shift out of the construction and manufacturing sectors in the prior decade. Local government and retail jobs also have a smaller share of employment in Adams County in 2016, compared to 2006. Expanding industry sectors in Adams County include Health Care (+1.7\%) Administrative and Waste Disposal ( $+1.3 \%$ ), Professional, Science, and Technical Services ( $+1.0 \%$ ), and Entertainment, Food Service, and Accommodation ( $+1.0 \%$ ). (Click here to return to text)
Data Source: Bureau of Economic Analysis *Note: The BEA suppresses values for certain sectors in some years, and in some cases we have had to estimate these values, by looking at the distribution of employment between the suppressed sectors for other years. Estimates are controlled to fit within the total number of jobs in the BEA dataset. The Adams County Health Care and Education employment shares were estimated in this way.

Table E1: Educational Attainment of the 25+ Population

In general, adults in Adams County have lower levels of educational attainment than those in Pennsylvania and the United States. However, educational attainment in Adams County is improving, and this improvement is happening at similar rates to these comparison areas. (Click here to return to text)

| Black | 17.5\% | 13.7\% | -3.8\% | 14.5\% | 11.5\% | -3.0\% | 16.4\% | 6.3\% | -10.1\%* |
| Latino | 29.6\% | 23.4\% | -6.2\% | 20.6\% | 17.4\% | -3.2\% | 30.8\% | 19.3\% | -11.5\%* |
| White Non-Latino | 10.4\% | 8.1\% | -2.3\% | 8.2\% | 6.6\% | -1.6\% | 7.7\% | 6.5\% | -1.2\% |
| Percent Uninsured by Age Group |  |  |  |  |  |  |  |  |  |
| Under 6 years old | 6.1\% | 4.8\% | -1.3\% | 5.3\% | 5.0\% | -0.3\% | 7.6\% | 5.8\% | -1.8\% |
| Ages 6-17 | 8.4\% | 6.4\% | -2.0\% | 5.3\% | 4.7\% | -0.6\% | 5.3\% | 4.5\% | -0.8\% |
| Ages 18-24 | 26.4\% | 16.4\% | -10.0\% | 17.8\% | 11.0\% | -6.8\% | 16.2\% | 10.3\% | -5.9\% |
| Ages 25-44 | 24.0\% | 19.5\% | -4.5\% | 16.6\% | 13.8\% | -2.8\% | 18.0\% | 12.9\% | -5.1\% |
| Ages 45-64 | 15.1\% | 12.3\% | -2.8\% | 9.7\% | 8.0\% | -1.7\% | 7.9\% | 7.6\% | -0.3\% |
| Ages 65 and older | 1.0\% | 0.9\% | -0.1\% | 0.5\% | 0.5\% | 0.0\% | 0.5\% | 0.3\% | -0.2\% |

The number, and share, of Adams County residents with health coverage has increased in recent years, especially for those ages 18-44. The uninsured rate for Adams County has decreased from 9.4\% in 2009-13 to 7.4\% in 2012-16. (Click here to return to text)
*Note: Estimates of Black and Latino uninsured rates above are based on relatively small sample sizes, which is important to consider when interpreting change over time.

## Overview - York County

All data in the tables below are extracted from Census Bureau American Community Survey (ACS) 1-year and 5-year estimates, except where noted. Since all ACS data is survey based, all of the estimates provided in this report are subject to sampling error. This report uses ACS 5-year survey estimates whenever possible because the data has larger sample sizes, which produces more precise estimates due to smaller sampling error. When population subgroups are particularly small, readers are reminded that large year-to-year changes in the estimates may be a result of sampling variability. All monetary values in the tables are expressed in 2016 inflation-adjusted dollars, using the CPI index for all urban consumers.

## Demographic Statistics

## A. Population Statistics

## Total Population

The county of York has grown at a significantly faster rate (1.9\%) than Pennsylvania (0.6\%), but at less than half the rate of the United States as a whole, which has a 2010-2016 population growth rate of 4.5\% (Table A1).

## Population Shares by Age

The populations of York and each comparison area are aging. York's population is shifting into older age cohorts at a faster rate, with the share of its population that is 65 and older increasing by $2.5 \%$ (compared to $2.0 \%$ for Pennsylvania and $2.2 \%$ for the United States) between 2010 and 2016. Additionally, the share of York's population that is under 18 is decreasing faster than that of the state (Table A2).

## Share of Population by Race and Ethnicity

White persons make up the largest racial group in York County ( $91 \%$ ). The White share of the population of York is decreasing slowly, displaying a trend similar to the state and the nation. The Latino population of York is growing; in 2016 Latinos constituted $7.2 \%$ of the county's population, which is an increase from $5.7 \%$ in 2010. (Table A3).

## B. Household Statistics

## Households by Occupancy

York has a much lower housing vacancy rate than the U.S. and Pennsylvania. York's rate of homeownership has decreased slightly in the last few years, showing a similar trend to Pennsylvania and the United States (Table B1).

## Housing Characteristics

Housing affordability, defined as the share of persons who are spending more than $30 \%$ of income on housing costs, is improving for York homeowners but becoming more difficult for renters. The median home value in York has dropped by more than it has in Pennsylvania; the trends in both of these areas are in contrast to the small increase in median home value that the nation as a whole has experienced (Table B2).

## Households by Type

The share of York County non-family households has increased slightly, and York has also experienced a drop in the share of marriedcouple households (from 54.9\% to 53.4\%). However, married-couple families remain the largest household type in York County (Table B3).

## C. Income Statistics

## Household and Family Income

Household incomes in York County have been declining for lower and middle-class households; only the highest quintile (the wealthiest 20\% of households) has experienced income gains between these two reference periods. Unlike York, the state and nation did see modest income gains for middle-income households (Table C1).

## Median Household Income by Race and Ethnicity

Large disparities in income exist between race and ethnicity groups in York, and in comparison areas. Overall, when inflation is taken into account, York County's median household income has declined slightly between these two reference periods (Table C2).

## Poverty

In the 5-year periods compared above, poverty rates are increasing in York, at the same time as poverty is decreasing in the United States as a whole, and remaining steady for Pennsylvania. It is notable that groups with low poverty rates, such as married couple families, White individuals, and the elderly, are experiencing small increases in their poverty rates. This is in contrast to groups with high poverty rates, such as single female-headed households, children, and some minority groups, which are experiencing decreases in poverty (Table C3).

## Households with Supplemental Benefits in the Past 12 Months

Consistent with the increase in its rate of poverty, York County also has higher counts of households receiving supplemental benefits such as cash public assistance or food stamps/SNAP in the 2012-16 period, compared to 2009-13 (Table C4).

## D. Employment Statistics

## Employment Status of the Population 16 Years and Older

York has experienced both a declining unemployment rate, and a declining rate of labor force participation over the 2014 to 2016 period. Its trends are similar to those in Pennsylvania as a whole. Pennsylvania hasn't kept pace with the nation's improvement in its unemployment rate from 2014 to 2017, but York County has done slightly better than the state in terms of unemployment since the recession's peak in 2010 (Table D1).

## Means of Transportation to Work

The share of workers who work from home has increased in all areas between 2014 and 2016. York has a high, and increasing, share of workers who drive alone to their places of employment. However, the average commute in York is shorter in 2016, when compared to 2014 (Table D2).

## Employment by Occupation

These data show how the types of jobs that workers hold in York have changed in the prior 6 years. York has seen jobs moving into healthcare practitioner ( $+0.8 \%$ ), food service ( $+0.6 \%$ ), and transportation (+0.7\%) occupations. Jobs have shifted away from sales and office occupations ( $-1.3 \%$ ), and from production occupations ( $-0.8 \%$ ). Each of these trends are similar to those in Pennsylvania and the United States, with the exception of York's increase in transportation jobs, which did not occur in the comparison areas (Table D3).

## Employment by Class of Worker

In York, the share of self-employed workers has fallen in the prior 6-years, with jobs shifting into the private and government sectors. The share of government jobs in has grown recently in York, in contrast to the decreases in Pennsylvania and the nation as a whole (Table D4).

## Employment by Industry Sector

Over the prior decade, York has experienced a rapid shift in jobs away from manufacturing ($3.4 \%$ ) and growth in the sectors of Health Care (+1.9\%) and Finance, Real Estate, and Management (+1.6\%) (Table D5).

## E. Education Statistics

## Educational Attainment of the 25+ Population

The educational attainment profile of York is improving, but not as fast as those of Pennsylvania or the United States (Table E1).

## School Enrollment

In York, school enrollment for preschool aged (3-4 years) and college aged (18-24 years) has increased. Both of these positive trends are in contrast to those of Pennsylvania as a whole. Notably, York's increase in college attendance appears to be driven by women, as the share of men ages 18-24 that are enrolled in college has barely changed over the prior three years. School enrollment for older adults (ages 25+) has decreased in York, as it has in Pennsylvania and the United States (Table E2).

## G. Health Care Access Statistics

## Health Insurance Coverage

Health coverage has increased in York, as it has in Pennsylvania and the United States. In York, this trend is driven by an increase in public coverage rather than private health insurance. The rates of uninsured individuals have dropped steeply for persons ages $18-24$, and more slowly for the 25-64 population (Table G1).

Table A1: Total Population

|  | United States |  |  | Pennsylvania |  |  | York County |  |  |

White persons make up the largest racial group in York County (91\%). The White share of the population of York is decreasing slowly, displaying a trend similar to the state and the nation. The Latino population of York is growing; in 2016 Latinos constituted $7.2 \%$ of the county's population, which is an increase from
$5.7 \%$ in 2010. (Click here to return to text)
Data Source: Census Population Estimates Program *Note: because persons can be of multiple race and ethnicity categories, the numbers above do not add up to $100 \%$. These data by race are based on persons reporting that they are a particular race alone or in combination with other race categories.

| Housing units with a mortgage | 66.4\% | 64.1\% | -2.2\% | 62.4\% | 61.0\% | -1.4\% | 68.5\% | 66.4\% | -2.0\% |
| Housing units without a mortgage | 33.6\% | 35.9\% | 2.2\% | 37.6\% | 39.0\% | 1.4\% | 31.5\% | 33.6\% | 2.0\% |
| Median Value (2016 dollars) | \$182,000 | \$184,700 | \$2,700 | \$169,700 | \$167,700 | -\$2,000 | \$179,500 | \$168,300 | -\$11,200 |
| Households spending 30\% or more of income on owner costs | 28.7\% | 24.9\% | -3.9\% | 26.0\% | 23.4\% | -2.6\% | 27.8\% | 24.7\% | -3.2\% |
| Renter-Occupied Housing |  |  |  |  |  |  |  |  |  |
| Occupied units paying rent | 40,534,516 | 42,835,169 | 2,300,653 | 1,495,915 | 1,536,223 | 40,308 | 41,666 | 42,876 | 1,210 |
| Median monthly rent (2016 dollars) | \$931 | \$949 | \$18 | \$838 | \$859 | \$21 | \$845 | \$871 | \$26 |
| Households spending 30\% or more of income on rent | 52.3\% | 51.1\% | -1.2\% | 50.2\% | 49.6\% | -0.6\% | 48.7\% | 50.6\% | 1.9\% |

Housing affordability, defined as the share of persons who are spending more than $30 \%$ of income on housing costs, is improving for York homeowners but becoming more difficult for renters. The median home value in York has dropped by more than it has in Pennsylvania; the trends in both of these areas are in contrast to the small increase in median home value that the nation as a whole has experienced. (Click here to return to text)
Table B3: Households by Type

Household incomes in York County have been declining for lower and middle-class households; only the highest quintile (the wealthiest 20\% of households) has experienced income gains between these two reference periods. Unlike York, the state and nation did see modest income gains for middle-income households. (Click here to return to text)
Table C2: Median Household Income by Race and Ethnicity (Inflation-Adjusted 2016 Dollars)

Large disparities in income exist between race and ethnicity groups in York, and in comparison areas. Overall, when inflation is taken into account, York County's median household income has declined slightly between these two reference periods. (Click here to return to text)
*Note: Estimates of Black and Latino median household income above are based on relatively small sample sizes, which is important to consider when interpreting change over time.

| Individual poverty by age |  |  |  |  |  |  |  |  |  |
| Under 18 years | 21.6\% | 21.2\% | -0.4\% | 18.8\% | 19.1\% | 0.3\% | 14.8\% | 16.0\% | 1.2\% |
| 18-64 years | 14.3\% | 14.2\% | -0.1\% | 12.6\% | 12.7\% | 0.1\% | 9.3\% | 9.4\% | 0.1\% |
| 65 years and over | 9.4\% | 9.3\% | -0.1\% | 8.3\% | 8.1\% | -0.2\% | 5.9\% | 6.8\% | 0.9\% |
| Individual poverty by race |  |  |  |  |  |  |  |  |  |
| Black | 27.1\% | 26.2\% | -0.9\% | 28.6\% | 28.2\% | -0.4\% | 27.9\% | 25.2\% | -2.7\%* |
| Latino | 24.7\% | 23.4\% | -1.3\% | 32.3\% | 31.5\% | -0.8\% | 35.7\% | 32.1\% | -3.6\%* |
| White non-Latino | 10.6\% | 10.6\% | 0.0\% | 9.6\% | 9.6\% | 0.0\% | 7.2\% | 7.6\% | 0.4\% |

In the 5 -year periods compared above, poverty rates are increasing in York, at the same time as poverty is decreasing in the United States as a whole, and remaining steady for Pennsylvania. It is notable that groups with low poverty rates, such as married couple families, White individuals, and the elderly, are experiencing small increases in their poverty rates. This is in contrast to groups with high poverty rates, such as single female-headed households, children, and some minority groups, which are experiencing decreases in poverty. (Click here to return to text)
*Note: Some poverty rate estimates above are based on relatively small sample sizes, which is important to consider when interpreting change over time.
Table C4: Households with Supplemental Benefits in the Past 12 Months

|  | United States |  |  | Pennsylvania |  |  | York County |  |  |

| Mean public assist. income (annual, 2016 Dollars) | \$3,923 | \$3,336 | -\$587 | \$3,059 | \$2,648 | -\$411 | \$2,900 | \$2,699 | -\$201 |
| Number of households with food stamp benefits | 14,339,330 | 15,360,951 | 1,021,621 | 585,892 | 644,209 | 58,317 | 15,377 | 18,091 | 2,714 |
| Share of households with food stamp benefits | 12.4\% | 13.0\% | 0.6\% | 11.8\% | 13.0\% | 1.2\% | 9.2\% | 10.8\% | 1.6\% |
| Share of households receiving food stamp benefits that are below the poverty level | 52.3\% | 50.3\% | -2.0\% | 52.9\% | 49.6\% | -3.3\% | 50.6\% | 46.3\% | -4.3\% |
| Share of households receiving food stamp benefits with one or more people 60 years and older | 26.0\% | 29.2\% | 3.2\% | 27.5\% | 31.6\% | 4.1\% | 23.8\% | 27.8\% | 4.0\% |
| Share of households receiving food stamp benefits with children under 18 years | 55.5\% | 53.0\% | -2.5\% | 49.6\% | 46.8\% | -2.8\% | 56.0\% | 53.3\% | -2.7\% |

Consistent with the increase in its rate of poverty, York County also has higher counts of households receiving supplemental benefits such as cash public assistance or food stamps/SNAP in the 2012-16 period, compared to 2009-13. (Click here to return to text)

Table D1: Employment Status of the Population 16 years and older

Figure D1: Unemployment Rate 2000-2017

York has experienced both a declining unemployment rate, and a declining rate of labor force participation over the 2014 to 2016 period. Its trends are similar to those in Pennsylvania as a whole. Pennsylvania hasn't kept pace with the nation's improvement in its unemployment rate from 2014 to 2017, but York County has done slightly better than the state in terms of unemployment since the recession's peak in 2010. (Click here to return to text)
Data Source for unemployment rates: Bureau of Labor Statistics
Table D2: Means of Transportation to Work

|  | United States |  |  | Pennsylvania |  |  | York County |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2014 | 2016 | change | 2014 | 2016 | change | 2014 | 2016 | change |
| Drove alone | 76.5\% | 76.3\% | -0.1\% | 76.4\% | 76.1\% | -0.3\% | 85.1\% | 86.1\% | 1.0\% |
| Carpooled | 9.2\% | 9.0\% | -0.2\% | 8.5\% | 8.4\% | -0.2\% | 8.3\% | 7.3\% | -1.0\% |
| Public transportation | 5.2\% | 5.1\% | -0.1\% | 5.7\% | 5.6\% | -0.2\% | 0.8\% | 0.8\% | -0.1\% |
| Walked | 2.7\% | 2.7\% | 0.0\% | 3.9\% | 3.6\% | -0.2\% | 1.4\% | 1.6\% | 0.2\% |
| Other means | 1.9\% | 1.8\% | -0.1\% | 1.4\% | 1.5\% | 0.1\% | 1.2\% | 0.6\% | -0.6\% |
| Worked at home | 4.5\% | 5.0\% | 0.6\% | 4.1\% | 4.8\% | 0.7\% | 3.2\% | 3.6\% | 0.5\% |
| Mean travel time to work (minutes) | 26.0 | 26.6 | 0.6 | 26.4 | 26.9 | 0.5 | 27.6 | 27.2 | -0.4 |

The share of workers who work from home has increased in all areas between 2014 and 2016. York has a high, and increasing, share of workers who drive alone to their places of employment. However, the average commute in York is shorter in 2016, when compared to 2014. (Click here to return to text)

| Protective service occupations | 2.2\% | 2.2\% | 0.0\% | 1.9\% | 2.0\% | 0.1\% | 1.8\% | 2.1\% | 0.4\% |
| Food preparation and serving related occupations | 5.4\% | 5.8\% | 0.4\% | 5.5\% | 5.8\% | 0.3\% | 5.2\% | 5.7\% | 0.6\% |
| Building and grounds cleaning and maintenance occupations | 3.9\% | 3.9\% | 0.1\% | 3.5\% | 3.5\% | 0.0\% | 3.0\% | 3.3\% | 0.3\% |
| Personal care and service occupations | 3.3\% | 3.7\% | 0.4\% | 3.0\% | 3.6\% | 0.6\% | 2.8\% | 2.9\% | 0.1\% |
| Sales and office occupations | 25.4\% | 23.8\% | -1.5\% | 25.4\% | 23.6\% | -1.7\% | 24.8\% | 23.5\% | -1.3\% |
| Farming, fishing, and forestry occupations | 0.7\% | 0.7\% | 0.0\% | 0.4\% | 0.5\% | 0.0\% | 0.4\% | 0.3\% | -0.1\% |
| Construction and extraction occupations | 5.7\% | 5.0\% | -0.7\% | 5.0\% | 4.5\% | -0.5\% | 5.8\% | 4.7\% | -1.1\% |
| Installation, maintenance, and repair occupations | 3.4\% | 3.2\% | -0.2\% | 3.4\% | 3.2\% | -0.2\% | 4.4\% | 4.4\% | 0.0\% |
| Production occupations | 6.3\% | 5.9\% | -0.4\% | 6.9\% | 6.3\% | -0.5\% | 9.9\% | 9.1\% | -0.8\% |
| Transportation occupations | 3.6\% | 3.6\% | 0.1\% | 3.7\% | 3.7\% | 0.0\% | 3.5\% | 4.2\% | 0.7\% |
| Material moving occupations | 2.5\% | 2.6\% | 0.1\% | 3.3\% | 3.3\% | 0.0\% | 4.4\% | 4.6\% | 0.2\% |

These data show how the types of jobs that workers hold in York have changed in the prior 6 years. York has seen jobs moving into healthcare practitioner $(+0.8 \%)$, food service $(+0.6 \%)$, and transportation ( $+0.7 \%$ ) occupations. Jobs have shifted away from sales and office occupations ( $-1.3 \%$ ), and from production occupations $(-0.8 \%)$. Each of these trends are similar to those in Pennsylvania and the United States, with the exception of York's increase in transportation jobs, which did not occur in the comparison areas. (Click here to return to text)

Table D4: Employment by Class of Worker

|  | United States |  |  | Pennsylvania |  |  | York County |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | 2006-10 | 2012-16 | change | 2006-10 | 2012-16 | change | 2006-10 | 2012-16 | change |
| Private wage and salary | 78.5\% | 79.8\% | 1.3\% | 82.4\% | 84.2\% | 1.8\% | 83.7\% | 84.1\% | 0.4\% |
| Government | 14.8\% | 14.0\% | -0.8\% | 11.7\% | 10.6\% | -1.1\% | 10.7\% | 11.1\% | 0.3\% |
| Self-employed | 6.5\% | 6.0\% | -0.5\% | 5.7\% | 5.1\% | -0.6\% | 5.4\% | 4.7\% | -0.8\% |
| Unpaid family workers | 0.2\% | 0.2\% | 0.0\% | 0.2\% | 0.1\% | 0.0\% | 0.1\% | 0.2\% | 0.0\% |

In York, the share of self-employed workers has fallen in the prior 6 -years, with jobs shifting into the private and government sectors. The share of government jobs in has grown recently in York, in contrast to the decreases in Pennsylvania and the nation as a whole. (Click here to return to text)

Over the prior decade, York has experienced a rapid shift in jobs away from manufacturing ( $-3.4 \%$ ) and growth in the sectors of Health Care ( $+1.9 \%$ ) and Finance, Real Estate, and Management ( $+1.6 \%$ ). (Click here to return to text)
Data Source: Bureau of Economic Analysis *Note: The BEA suppresses values for certain sectors in some years, and in some cases we have had to estimate these values, by looking at the distribution of employment between the suppressed sectors for other years. Estimates are controlled to fit within the total number of jobs in the BEA dataset. The Adams County Health Care and Education employment shares were estimated in this way.

Table E1: Educational Attainment of the 25+ Population

The educational attainment profile of York is improving, but not as fast as those of Pennsylvania or the United States. (Click here to return to text)

| Share of men ages 18-24 enrolled in college | 38.7\% | 38.7\% | 0.0\% | 41.8\% | 40.8\% | -1.0\% | 28.1\% | 27.9\% | -0.2\% |
| Share of women ages 18-24 enrolled in college | 47.5\% | 47.1\% | -0.4\% | 50.9\% | 49.1\% | -1.8\% | 37.1\% | 39.1\% | 2.0\% |

In York, school enrollment for preschool aged (3-4 years) and college aged (18-24 years) has increased. Both of these positive trends are in contrast to those of Pennsylvania as a whole. Notably, York's increase in college attendance appears to be driven by women, as the share of men ages 18-24 that are enrolled in college has barely changed over the prior three years. School enrollment for older adults (ages 25+) has decreased in York, as it has in Pennsylvania and the United States. (Click here to return to text)

## II. Health Statistics

Table G1. Health Insurance Coverage

|  | 2009-13 | United States 2012-16 |  | 2009-13 | Pennsylvania 2012-16 |  | 2009-13 | York County 2012-16 | change |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Health Coverage |  |  |  |  |  |  |  |  |  |
| Population with health coverage | 260,878,830 | 276,875,891 | 15,997,061 | 11,296,309 | 11,579,382 | 283,073 | 392,485 | 404,247 | 11,762 |
| \% of population with coverage | 85.1\% | 88.3\% | 3.2\% | 90.2\% | 92.0\% | 1.8\% | 90.9\% | 92.8\% | 1.9\% |
| \% with private health insurance | 66.0\% | 66.7\% | 0.7\% | 73.0\% | 73.0\% | 0.0\% | 75.9\% | 75.5\% | -0.4\% |
| \% with public coverage | 30.2\% | 33.0\% | 2.8\% | 31.4\% | 33.5\% | 2.1\% | 28.2\% | 31.2\% | 3.0\% |
| \% of population without health coverage | 14.9\% | 11.7\% | -3.2\% | 9.8\% | 8.0\% | -1.8\% | 9.1\% | 7.2\% | -1.9\% |
| Percent Uninsured by Race and Ethnicity |  |  |  |  |  |  |  |  |  |
| Black | 17.5\% | 13.7\% | -3.8\% | 14.5\% | 11.5\% | -3.0\% | 15.4\% | 10.9\% | -4.5\% |
| Latino | 29.6\% | 23.4\% | -6.2\% | 20.6\% | 17.4\% | -3.2\% | 19.9\% | 18.1\% | -1.8\% |
| White Non-Latino | 10.4\% | 8.1\% | -2.3\% | 8.2\% | 6.6\% | -1.6\% | 7.9\% | 6.2\% | -1.7\% |
| Percent Uninsured by Age Group |  |  |  |  |  |  |  |  |  |
| Under 6 years old | 6.1\% | 4.8\% | -1.3\% | 5.3\% | 5.0\% | -0.3\% | 3.9\% | 3.6\% | -0.3\% |
| Ages 6-17 | 8.4\% | 6.4\% | -2.0\% | 5.3\% | 4.7\% | -0.6\% | 3.9\% | 3.4\% | -0.5\% |
| Ages 18-24 | 26.4\% | 16.4\% | -10.0\% | 17.8\% | 11.0\% | -6.8\% | 22.2\% | 10.4\% | -11.8\% |
| Ages 25-44 | 24.0\% | 19.5\% | -4.5\% | 16.6\% | 13.8\% | -2.8\% | 15.0\% | 13.0\% | -2.0\% |
| Ages 45-64 | 15.1\% | 12.3\% | -2.8\% | 9.7\% | 8.0\% | -1.7\% | 8.6\% | 7.3\% | -1.3\% |
| Ages 65 and older | 1.0\% | 0.9\% | -0.1\% | 0.5\% | 0.5\% | 0.0\% | 0.3\% | 0.2\% | -0.1\% |

Health coverage has increased in York, as it has in Pennsylvania and the United States. In York, this trend is driven by an increase in public coverage rather
than private health insurance. The rates of uninsured individuals have dropped steeply for persons ages 18-24, and more slowly for the 25-64 population. (Click here to return to text)

## Appendix F: Robert Wood Johnson County Health Rankings Data Summary

Appendix F
Table F-1. Robert Wood Johnson County Health Rankings Comparison Table. The table below shows the 2018 Robert Wood Johnson County Health Rankings comparison data for 2018. The table columns compare nation-wide top performers, the United States overall, Pennsylvania overall, Pennsy/vania top performers, and countylevel rankings data for York, Adams, Lancaster, and Lebanon Counties. Adams County outperforms York County in overall rankings, with the exception of their clinical care rank. All four counties perform in the bottom of the state in physical environment rank.

Figure F-1. Health Factors Ranking Trend. The figure above shows the movement of counties on their health factors ranking from 2010 to 2018. Counties with sharp declines in ranking are outlined in red, and counties with sharp increases in ranking are outlined in green. York and Adams Counties are outlined in blue.

Figure F-2. Health Outcomes Ranking Trend. The figure above shows the movement of counties on their health outcomes ranking from 2010 to 2018. Counties with sharp declines in ranking are outlined in red, and counties with sharp increases in ranking are outlined in green. York and Adams Counties are outlined in blue.

Appendix F
Adams County

Figure F-3. Relative Health Rankings, Adams County, 2018. This figure displays the relative ranking of Adams County in 2018 and trend data (average rank) from 20102018 to other Pennsy/vania counties on individual health indicators. Lower scores closer to the left hand axis indicate stronger relative performance, in that fewer counties perform better on that indicator. Different colors represent different years. Not all indicators have data for all years. Calculations by the Center for Opinion Research based on Robert Wood Johnson Foundation County Health Rankings data.

York County

Figure F-4. Relative Health Rankings, York County, 2018. This figure displays the relative ranking of York County in 2018 and trend data (average rank) from 2010 -2018 to other Pennsy/vania counties on individual health indicators. Lower scores closer to the left hand axis indicate stronger relative performance, in that fewer counties perform better on that indicator. Different colors represent different years. Not all indicators have data for all years. Calculations by the Center for Opinion Research based on Robert Wood Johnson Foundation County Health Rankings data.
